

3 Handy Steps to Cleaning your car

What you need

- A hose
- A wash mitt
- A bucket
- Car shampoo
- Microfibre cloth or chamois leather

Rinse it

- Rinse off loose dirt and mud
- Lift the windscreen wipers
- Blast the undersides of the wheels and hubcaps with the hose

Wash it

- First and foremost, make sure your wash mitt is squeaky clean - any marks or grime can ruin the finish
- Fill a bucket with tepid water and car shampoo
- Where there are muddier areas, use a different sponge
- Rinse your car by using a hose pipe to remove any residue of soapy water

Dry it

- Don't let the water completely evaporate - use a microfibre cloth or chamois leather to dry the car clean
- Remember to dry every area of the car as quickly as possible - including the roof, just above the windows, and the windows themselves
