Our print service will help you to deliver on your CSR strategy

OUR STORY

In 2005 we became interested in the eco-movement which was gathering speed in terms of recycling and environmental awareness. Pondering how we might incorporate this in to our business we had the proverbial light bulb moment and a massive billboard with 'eco-printing' pointed to the way ahead.

Within six months we had written and launched our website, tested all the recycled and eco papers available, sourced and trialled vegetable oil based inks, created new products and invested in two new presses. Suddenly the customers and their business came – hungry for an eco-printer with an online purchasing portal. And A Local Printer was born.

HARNESSING A PASSION

A Local Printer was the first online printer in the UK to offer a fully eco-friendly online print service. All of our products are as eco today as they were in 2006 when our website went live. Creating a 100% eco-friendly printing website allowed us to harness the passion we felt for 'doing our bit to save the planet' and we truly believe that we might have helped just a little bit.
